

Playground

Waverley Park is a popular destination for families, being situated on Bondi Road, just outside the Bondi Junction commercial centre. The park is a large urban park with mature trees and elements from the federation period.

Sturt Noble Associates were engaged to design and document an upgrade of the playground area in response to demands for improvements by informal users, especially mothers with young children. In addition, the adjoining BBQ and picnic area was to be upgraded and re-designed to establish a stronger relationship with the playground.

The resultant design has created a highly useable recreation area and improved play space for both residents and visitors alike. Upgrade of the existing playground facilities included the refurbishment of a classic "rocketship". It is successful in both retaining the heritage feel of the old playground whilst upgrading the facilities to current best practice in universal access, safety and play opportunity.
